### **DETAILED ACTION**

Applicants' response, which included cancellation of claims 46, 51-53, 57 and amendment to claims 47-50, 54-56, 58 and 59, filed on 4/11/2007, is made of record. Claims 47-50, 54-56 and 58-67 are now pending. In view of applicants' response, the 112 first and second paragraph rejections and 103 rejections made in the previous office action have been obviated. However, the following rejections, which are necessitated by applicants' amendment, are applied process claim 56.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 56 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment to Q introduces new matter. Note Q in the final product is substituted phenyl on a furanyl group substituted by phenyl. There is no support for such a group in the specification. The amendment clearly has introduced new matter, which does not commensurate with the original scope of the process claim 56.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1624

Claim 56 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

1. The definition of Q in process claim 56 is unclear. With the newly added Q definition one cannot arrive at the desired product of formula I. The product will be distinct and different from those embraced in the instant claims. An appropriate correction is needed.

#### ***Allowable Subject Matter***

Claims 46-50, 54, 55 and 58-67 are allowed barring finding of any prior art in a subsequent search. Said claims are deemed as allowable since the closest prior art Nagamatsu et al., JP09255681, as pointed out by the applicants, does not teach instant  $R^5$  groups, at least one of which must be present since  $m=1$ .

#### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1624

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
